From September 11-15, 2017, the Center for Excellence on Generalization in Health and Psychopathology will host an international summer school on **Emotional Learning and Memory in Health and Psychopathology**.

The summer school targets participants with a profound interest in both the basic mechanisms of emotional learning and memory as well as anomalies associated with psychopathology.

Internationally renowned speakers will provide a number of **state of the art lectures** on the acquisition, extinction, reconsolidation, and generalization of emotional memory.

In addition, the program will offer a variety of **clinical and practical workshops** (e.g., on exposure therapy and lab techniques) and **small-group discussions** with the experts.
